

# MVP 1

**Description:** Waddle SF is a walking app for safest route from starting point to ending location in San Francisco based on current time.

**Benefit:** Visitors, primarily tourists are unfamiliar with the city and don't know what is in every district and how safe they will be carrying a camera. This will locate areas to avoid areas based on the time of day.

**Target Audience:** Visitors of San Francisco = tourists

**Technical Feature:** GPS location, Google Maps, clock

# MVP 2

**Description:** Waddle SF is a walking app for flattest route from starting point to ending location in San Francisco.

**Benefit:** Visitors, primarily tourists are unfamiliar with the city and a map doesn't show topographical features of San Francisco. This will help avoid the hilly areas of San Francisco.

**Target Audience:** Visitors of San Francisco = tourists

**Technical Feature:** GPS location, Google Maps

# MVP 3

**Description:** Waddle SF is a San Francisco app that allows a user to avoid or be informed of recent crimes based on their area or entire San Francisco area.

**Benefit:** An available list of crimes from SFGov will be available for curiosity or informational purposes as a way to plan the day.

**Target Audience:** Visitors of San Francisco = tourists

**Technical Feature:** Google Maps, GPS, internet connection

# MVP 1 & 2 - Proof of Concept
